

- write an argumentative essay on 'Is competition really good in school education?'

My answer is YES. Because in the school definitely have a competition among the students. Competition mean, one student or all the other students trying to get high marks for the subjects and wish to be the first in the class. as well think to get high marks better than others. this is the competition in the school.

The school is the important place to educate to students. There are more students in studying in the school and the same class. Then there can be a competition among the students. Because there are some exams, presentations, and etc... So all the students like to get high marks and wish to get a good result and all are like to be the first in the class from exams or another competition. So, then there is a good competition among the students.

As I think the competition among students is really good, Because there are so many advantages from that.

Because of the competition in the school,

- All students are trying to do work hard.

- All are trying to get high marks better than some others.
- All are trying to be the first place in the class.

So then all the students work hard. Then the all students can do their work, studies very well.

As well. School teacher also need to see all the students come to a great place. In the school there maybe some weak students as well there may be some clever students for the education. Because of the competition in the education weak students also can become a clever student. Because of this competition in the school, weak students think, why we can't do work more, why we can't get high marks for the exams, why we can't be the first place in the class etc... and then they will be motivate.

And after that they also trying to do work hard. And oneday they can go to their target in very soon.

As well clever students trying to do more work because of the competition. So then automatically all the students will be able to go to a great place.

ex: they can get high marks for the subjects in the exams.

Then school teacher also can go to her/his target. Because all the teachers need to carry the students to the best place in the world. Because of the competition among the students teacher can do that very easily.

So my opinion is competition is really good in school education.
